31st Dec

2016

Pay N10k instead of N15k & get both downloads!

This offer expires midnight Saturday 31st Dec. 2016

1. **[5 Part Audio]** Tested Strategies to Save Money (& Grow Profits) Running YOUR Farm Business

Delivery Mode: Five 30 Minute AMR audio files emailed to you for playback on phone or PC.

Duration: 2.5 hrs | **Price :** N10k

Description: Farm CEOs who correctly apply these secrets will experience increased success with fewer reasons to fret/stress daily. There are several strategies, but the most powerful of them all yields multidimensional rewards at low to zero cost: That strategy is "Reduce Variable Cost Inputs You Have to Spend Cash On!"

How do you do that? Simply carry out the 5 steps outlined below, and watch your profits grow!

A. Find ways to make/grow variable cost inputs yourself at low to zero cost.

B. If you have to buy them, find ways to pay without cash: Barter Is Smarter.

C. Or find ways to get them without paying upfront I.e. so you can later pay the supplier from your inevitable sales.

TIP: Cash flow is critical to profitable operation...AND everything is negotiable!

D. Setup a reliable Variable Costs data recording, analysis and report generation system to facilitate timely and accurate monitoring of your item's usages - to minimize avoidable losses like wastage or outright theft.

E. Use the historical records from your system to establish best practice control limits that will guide purchase/usage of each item by farm operatives. That way, budgeting/planning for Variable Cost inputs will become more predictable.

2. **[2 Part Audio]** Useful Ideas for Low Cost Animal Feed Production Using Local Ingredients - based on Civil War Experimentation by Biafran Scientists

[Audio Podcast] Amazing Story: How Biafran Scientists Innovated Low Cost Animal Feed (During the Nigerian Civil War) Using Zero Cost Local Ingredients

Subtitle: Tried & Tested practical ideas for Farm CEOs to deal with feed production hardships they face today!

A Buyer's Feedback Within Hours of Buying It:

"Good evening. I really enjoyed the audio lectures you have actually hit the nail on the head and you also strengthen some of my belie(f)s and convictions about running a farm. I would also like to know the names those plants you talked about on the lectures so that I can learn more about them. Finally I would like to get the PDF or URL link to the Indian website that carried out research on alternative feed ingredients for livestock feed production. Thanks a lot." - Aliyu Muhammed, Sent from my iPad

Delivery Mode: 2 AMR Audio files emailed to you

Duration: 1.5 hrs | **Price:** N5k

Aliyu i.e. the above CEO sent me the message below via Facebook a week before buying this audio series :

"Good day sir I sent you the link to your article as a reference. I really enjoy your articles even though I have not yet bought any of your products yet. I love your thinking I wish more Africans can think like you not just Nigerians. Best regards. P. S. Thanks a lot for the wonderful articles. Keep it up"
